PROFESSIONAL EXPERIENCE

Software Engineer, Mirae Distribution Pte Ltd

Jun 2025 - Aug 2025

- Maintained and debugged a Python-based dynamic pricing system for refurbished electronics listed on Backmarket.com
- Fixed and extended automated repricing bots that monitored competitor listings and adjusted prices in real time to win marketplace buy-box placement
- Diagnosed and resolved backend infrastructure issues, including MongoDB, Redis

Internship, Fujitsu Asia Pte Ltd (FAPL)

May 2022 - Aug 2022

- Supported and updated over 10 software programs at ITE West, collaborating with the IT team to complete system upgrades that enhanced performance and security.
- Assisted in troubleshooting technical issues for 100+ users, reducing downtime by 15%.
- Gained hands-on experience with system integration and network management in a real-world educational environment.

SELECTED PROJECTS

Stock Watcher — RAG Chatbot for Market Data

Sep 2026

- Built a Flask app that answers natural-language questions about a stock watchlist using retrieval-augmented generation, grounded in live prices, news, and SEC 10-K filings
- Implemented incremental OpenAI embeddings with file-locking and per-route rate limiting to prevent race conditions and control API costs as the index grows
- Wrote a pytest suite covering RSS parsing, filing text chunking, and ticker detection against mocked feed data

LOOP'd – E-Commerce Platform

Dec 2025 - Present (Prototype)

- Independently built the full technical stack (auth, database, storefront, and checkout) for a blind-box bracelet e-commerce concept
- Developed a custom PayNow QR payment integration as a serverless Deno function, generating EMV-compliant payloads with CRC16 validation and server-side price checks
- Gained hands-on experience in secure payment system design, serverless backend architecture

Nutritional Chatbot, SIM UOL CSSC Hackathon

Nov 2025

- Implemented an image-to-pantry feature using the OpenAI Vision API to detect food items from user-uploaded photos and log them as tracked ingredients
- Built a GPT-powered recipe generator that suggested recipes based on ingredients in the user's pantry

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C#

Cloud & Backend: AWS, Supabase, Flask, Serverless Functions, SQL, API Development & Integration

AI & Automation: OpenAI API / LLM Integration, n8n / Workflow Automation, Prompt Engineering

Security & Networking: Cryptography & Encryption Techniques, Network Security, Cloud Security

EDUCATION

Bachelor of Science in Computer Science

Oct 2025 - Sep 2027 (Ongoing)

University of London (Goldsmiths)

Diploma in Information Technology

Apr 2020 - Mar 2023

Nanyang Polytechnic

ADDITIONAL INFORMATION

Languages: English, Mandarin

Certifications: Amazon Web Services (AWS) Certified Cloud Practitioner, PCEP™ – Certified Entry-Level Python Programmer, Professional Scrum Developer™ (PSD) certification, Certified Tableau Desktop Specialist, Oracle Database SQL Certified Associate, Qualified Information Security Professional (QISP®)
